Faith-Based Planning: Aligning Financial Decisions With Biblical Convictions

At Vulpes Stewardship Institute, we empower Christians to turn their faith into financial success by embracing and applying biblical values. Align your financial journey with your spiritual beliefs and create an Income Flow of Life! Faithful stewardship, allowing believers to consider not only financial goals, but also the values represented by the companies and activities their investments may support.

Biblical stewardship begins with God's truth and becomes visible through faithful living.

"What will it profit a man if he gains the whole world and loses his own soul?" (Mark 8:36). These words of Jesus remind us that financial decisions should never be separated from the faith, purpose, and convictions to align your beliefs with faith based strategies, to empower you with biblically responsible financial plans. At Vulpes Stewardship Institute, we equip your community to invest wisely and with wisdom and integrity. Faith based screening provides a practical way to evaluate investments through both a financial and biblical-values perspective.

Planning

We begin with a solid foundation that faithful stewardship influences how we give, save, invest, prepare for retirement and plan the legacy we hope to leave, that align with your beliefs. With a foundation of stewardship and generosity, offering automated donations directly to a church or chosen charity. Additionally, our faith focused savings and investment options are screened for eVALUEator-based violations, and these funds undergo regular reviews.

Stewardship is the faithful management of every resource entrusted to us, including our time, relationships, abilities, opportunities, and financial resources.

Every investment reflects a set of values. Screening helps identify companies and activities that may conflict with an investor's sincerely held biblical convictions. The following pages summarize the primary areas reviewed.

Areas screened:

Entertainment sponsors that are spending advertising money on questionable content in broadcast television, radio, and online. This content often includes sexually explicit, violent, or profane material. This behavior ultimately harms the positive values that parents want to teach their children.
